(54) PRODUCTION OF SYNTHETIC RESIN DECORATIVE SHEET

(57)Abstract:

PURPOSE: To obtain the title decorative sheet having a high chroma, depth, solid feeling and masking effect, by using a base paper formed from an upper layer containing a pigment effective for design integrated with a lower layer containing a pigment effective for masking.

CONSTITUTION: An upper layer consisting of at least one paper layer containing a pigment or a loading material effective for design and a lower layer consisting of at least one paper layer containing a pigment or a loading material effective for masking, are piled up, combined, and integrated to give a composite base paper for a decorative sheet. The composite base paper is placed on a substrate, if necessary with a surface, a masking, a balance paper, etc., and integrated to give the desired decorative sheet
